

WeBS COUNTS IN THE LONDON AREA, 2010-2011

DAVID DARRELL-LAMBERT

This paper on the Wetland Bird Survey (WeBS*) for the London Area from July 2010 to June 2011 follows the 2009-2010 analysis, looking at how important the London Area is for wildfowl on an international and national scale. We can now compare it to the prior year's data and look for changes in the population or preferred locations. There are still some gaps in our knowledge, with some sites not covered fully during the period; we hope these sites are covered fully in future years to enable a fuller review of the area.

The WeBS sites are divided into nine regions, which are listed on pages 2-3: page 2 lists the sites within each region; page 3 lists the sites alphabetically by name.

The number of counts that reached internationally and nationally important levels increased, with new species added: Mute Swan, Common Tern and Kingfisher. Black-tailed Godwit did not reach significant levels, but the whole of the Thames was not counted during the period so may not reflect a population change but, rather, a reduced coverage. Shoveler have now reached internationally important levels at Lea Valley and South-west London. Gadwall have also increased at both sites with each site exceeding 1,000 birds. WeBS Counts of international and national importance are on page 4.

The table on pages 5-6 shows the WeBS counts for the whole of the London Area; the table for each region is on the following pages:

Colne Valley	6
Inner Thames	7
Lea Valley	8
Middlesex	9
South-west London	10
Outer Essex	11
Outer Hertfordshire	12
Outer Surrey	13
Outer Thames	14

All counts are completed on a monthly basis and are attempted to be completed on the same dates throughout the country to allow comparable totals to be compiled.

There were several sites which were not counted throughout the period. Walthamstow Reservoirs was only counted twice; this will affect wildfowl numbers present in the Lea Valley. Similarly William Girling Reservoir, Hooks Marsh, Hall Marsh Scrape and Friday were not covered fully during the period, all again present in the Lea Valley. A few counts were received for the Thames between Grays and Purfleet which would have an impact on the waders counted in the Outer Thames and may be responsible for the low counts of Black-tailed Godwits.

One of the species that is under-recorded is Yellow-legged Gull; counts along the Outer Thames show it should be at nationally important levels but these are not reflected from the WeBS counts. A possible reason is that counts at Rainham Marshes were only completed from September to March, missing the peak period in July/August.

All data included here are only present in the BTO-managed WeBS database, which is used to identify important areas in the UK.

* During each WeBS count, observers are asked to count swans, geese, ducks, divers, grebes, herons, cormorants, crakes, waders, skuas, gulls, terns and kingfishers and, within all these families, escapees and hybrids.

WeBS 2010-2011, sites within each region (by region)

Colne Valley

Batchworth Lake
 Broadwater Lake (North Surrey)
 Colne Valley Gravel Pits
 Denham Quarry Lake
 Frays Carp Lake
 Frays Middle Lake
 Frays Northern Lake
 Frays Wildfowl Lake
 Hampermill Lake
 Helicon and Pynesfield Gravel Pits
 Lynsters Gravel Pit
 Maple Lodge Nature Reserve
 North Troy Gravel Pit
 Stockers Lake and Bury Lake
 Troy Mill Gravel Pit

Inner Thames

Clapham Common
 Eagle Pond (Clapham Common)
 King's Mere (Wimbledon Common)
 London Wetland Centre
 Long Pond (Clapham Common)
 Lonsdale Road Reservoir
 Mount Pond
 Osterley Park Lake (Lower)
 Osterley Park Lake (Upper)
 Osterley Park Lakes
 Pen Ponds
 Pen Ponds (Lower)
 Pen Ponds (Upper)
 Queen's Mere (Wimbledon Common)
 River Thames - Putney Bridge to Battersea Bridge
 River Thames - Putney to Barnes
 River Wandle - Carshalton to Wandsworth
 St James's Park
 Wimbledon Common

Lea Valley

Amwell GP
 Bowyers Water
 Broxbourne Gravel Pits
 Cheshunt Gravel Pits
 Cheshunt Lake
 Cornmill Meadow
 East India Dock Basin
 Essex Filter Beds
 Friday Lake
 Hall Marsh Scrape
 Holyfield Marsh (Fishers Green) GP
 Hooks Marsh
 King George V Reservoirs
 Lee Valley Gravel Pits
 Middlesex Filter Beds
 Nazeing Gravel Pits
