

London Bird Report: List of Contents 1936 – 2017

NOTES

- Contents are listed by volume.
- The year date in a volume's title refers to the year covered by the contents of the volume, not the year in which it was published.
- Book reviews, annual lists of contributors of records, instructions for recording, and other ephemeral content have been excluded.
- Indexes or lists of selected contents were published in vol. 13 (covering the years 1916 – 1948 and taking into account ornithological papers in The London Naturalist prior to 1936), and Vol. 50 (covering the years 1936 – 1985).
- Volumes 1 (1936) to 5 (1940) were published as supplements to The London Naturalist and are listed as such in some library catalogues
- Further articles on ornithological subjects can be found in The London Naturalist.
- Many of the details in this list were gathered by electronically scanning the contents list printed in each volume. Hence the way the pagination of articles is shown varies; in many cases only the first page number is shown. This does not imply that an article is only one page long. Where no page number at all is given, that reflects the table of contents of the relevant volume.
- Information in square brackets has been added by the compilers.
- Where articles with the same title appeared on a yearly basis (e.g. 'Birds of the London Area') we have added the date in square brackets.
- Vol. 54 for 1989 contains an article describing and defining the **Inner London recording area**
- An additional worksheet, listing the contents in order of Author then Volume, has been added to coincide with the publication in May 2019 of LBR 2017, No.82.
